Question 3

1 pts

Which of the following is true about the agile method?

- It is used when a project team wants to provide a potentially shippable product earlier rather than later.
- It is used when project teams want to use the predictive approach to a project.
- It is often used when a project team can express the scope early in the product life cycle.
- It uses several iterations or deliveries of software instead of waiting until the end of the project to provide a product.
